

# NUCLEAR

Sales technician : M. Bertault

Armitec has been deploying its professional skills in **machining, boilermaking and maintenance since 1996** in numerous industrial sectors, aeronautical, agri-food, defense, environment, etc. and has been working on **nuclear sites since 2019**.

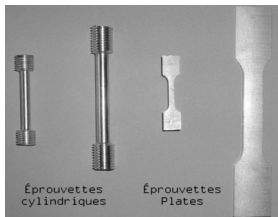

A team of technicians qualified and aware of this specific environment is assigned to a nuclear site in **Chinon**.

With the workshops in Saint-Viaud and Beaumont en Véron, the team benefits from operational support in case of need for spare parts and renovation or even for specific manufacturing.

## Production in the workshop

- Design of electrical cabinets and boxes
- Production of mechanically welded frames
- Various improvement services
- Machining of strength specimens

## On-site services

- Production on plan
- Manufacturing of strength specimens and expert samples
- Specific assembly and integrated services in machining and small boilermaking (recovery of scope, etc.)
- Maintenance of machine tools (camera, nuclearization of machines, etc.)
