

Maintenance Naval and offshore

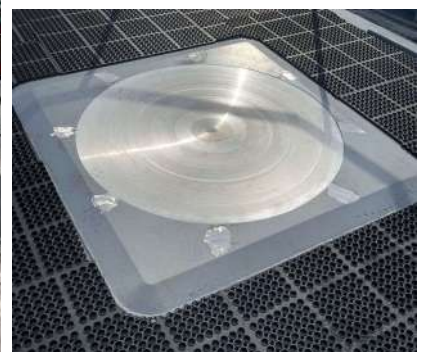

Contact : Mr. Lubas

Located between Nantes and Saint-Nazaire, Armitec's proximity to major clients allows it to allocate its know-how to naval and offshore construction and repair.

Armitec produces tailor-made parts in boilermaking, sheet metal work, mechanical welding, locksmithing and machining according to the needs identified on site.

We also offer repair and maintenance services for industrial equipment in the naval sector, in the workshop or on site, and have extensive experience in organizing refrigeration operations for ocean liner engines.

We also have a team trained and authorized to intervene at sea on offshore stations.
